Gary,

Do you have an updated schedule? Trying to see what's going to be happening at the site in July when I'm gone. Thanks.

Stephen

Stephen,

The National Remedy Review Board for the San Jacinto River Waste Pits site has been rescheduled for early June, so there is more time to put together any site/remedy comments you may have. Please send me any summary you may have by May 1, 2014. Please let me know if you have any questions on this.

Thanks,

Gary Miller

Subject: San Jacinto National Remedy Review Board

Stephen,

The EPA has scheduled a National Remedy Review Board (NRRB) meeting for the San Jacinto River Waste Pits Superfund Site. The NRRB reviews proposed high-cost cleanup decisions to help evaluate whether they are consistent with current law, regulations, and Agency policy and guidance. The meeting is scheduled for April 28, 2014.

The NRRB is a technical and policy review group made up of members that have experience with both regional and Headquarters perspectives in the Superfund remedy selection process. Its members include senior managers and technical experts from each EPA region, as well as senior technical and policy experts from other EPA offices. The product of the review is a memorandum

9594776

sent from the Board to the regional Superfund division director that documents the Board's recommendations about the proposed cleanup strategy.

The State may attend, in person or by phone, the information-gathering portion of the Board meeting and may speak for approximately 10 to 15 minutes about any specific concerns or issues. The State may also prepare a summary in writing, 20 pages or less, regarding any technical issues they believe are pertinent to the cleanup decision, including your recommended site cleanup approach and rationale for that approach. I will attach this summary to the site information package that will be submitted to the Board no later than Wednesday, April 2, 2014. Also, the summary will be made a part of the Administrative Record for the site.

Please let me know if you have any questions on this.

Regards,

Gary Miller
